ABOUT ME

Hello! I'm an enthusiastic junior web developer eager to learn, with a deep interest in new technologies and cross-platform development. I'm passionate about using best practices and creating clean, organized, and well-commented code. I invite you to explore my GitHub to discover the projects I'm working on!

WORK EXPERIENCE

Trainee Web Developer
GRUPO MAYO, S.L. | October 2023 - December 2023
- Collaboration in the development of a webinar platform with comprehensive features, including CRUD management, attendance control, and various views based on user role: speakers, moderator, and attendees.
- Implementation of a Restful API on the back-end.
- Technologies: Node.js, TypeScript, Express.js, Docker, React.js, SQL and Sequelize ORM.

PROJECTS

TaskTeam
Business Management System | 2023
- Motivation: to understand the flow and handling of data in an application that implements the MVC pattern.
- Learnings: implementation of a development model, from analysis to maintenance.
- Technologies: PHP, MySQ.L, BootStrap, HTML5, jQuery, JavaScript.
